

Anshul Raj Singh

Indian Statistical Institute, Bangalore Center

✉ bmat2405@isibang.ac.in 🌐 Personal Website

Education

Bachelor of Mathematics (Honours)

January 2026 - Present

Indian Statistical Institute, Bangalore

Expected graduation: *January 2028*

Aggregate: 86.6% (after two years)

Independent study and reading projects

- **Reading Project in Representation Theory of Finite Groups** *December 2025*
Studied J. P. Serre's *Linear Representations of Finite Groups* under the supervision of Prof. Manish Kumar at Indian Statistical Institute, Bangalore.
- **Reading Project in Analytic Number Theory** *June 2026*
Studied de la Vallée Poussin's proof of the Prime Number Theorem, the Prime Number Theorem for arithmetic progressions, Hardy–Littlewood's circle method, and wrote an exposition of Vinogradov's three primes theorem.

Preprints and Expositions

- **Vinogradov's three prime theorem** (draft) *June 2026*
- **On a square packing conjecture of Erdős**, arXiv:2601.22163 *January 2026*
We establish an equivalent formulation of an Erdős square-packing conjecture problem¹⁰⁶ and investigate related extremal packing problems using an inequality due to Praton.

Technical Skills

- **Programming:** Python, R.
- **Mathematical software:** PARI/GP (basic), NumPy, Jupyter Notebook, LaTeX
